

Hellas Gold Single Member S.A. is a gold, silver, lead and zinc mining company headquartered in Athens, Greece. Since 2004, Hellas Gold operates the Cassandra Mines at N.E. Chalkidiki, under the strictest EU safety and environmental standards and regulations. The Cassandra Mines consist of the operating mine at Olympias the state-of-the-art Kokkinolakkas Tailings Managements Facility and the Skouries project. Evolving a mining history of 25 centuries, Hellas Gold invests in the development of sustainable mining in the region, contributing to the local economic growth and prosperity with investments of more than \$1 billion, the employment of 1,600 people, the active support to the local suppliers, and important investments to local community initiatives and projects. Since 2012, Hellas Gold operates as a subsidiary of the Canadian-based Eldorado Gold Corporation, which has over 25 years of experience in exploration, construction and operation of mines around the world.

We live our values in pursuit of our purpose: to find a better way to do things. We aim to break new ground in all that we do. We do this by creating a positive impact today, and for future generations, through our commitment to operating safely, sustainably, and profitably.

The company offers the opportunity to those who wish to express interest in the position of '**Senior Project Engineer**' – '**Ανώτερος/η Μηχανικός Έργων**', for its premises in Chalkidiki. The position will be reported to the Chief Mining Engineer of the Technical Services department in Skouries.

Main Responsibilities:

- Initiating projects, preparing budget estimates, and justifying projects for AFE (Authorization for Expenditure) submission.
- Lead and manage engineering activities across multiple operational areas
- Managing the project lifecycle from scoping and detailed design to construction, commissioning, and handover.
- Providing engineering expertise, including guidance on standards, procedures, equipment strategies, condition monitoring, and failure analysis.
- Supervising contractors and inspecting project work to ensure adherence to quality standards.
- Maintaining cost control throughout all project phases and ensuring successful delivery.
- Maintaining a safe working environment by conducting risk assessments, JSAs, investigations, and enforcing site procedures and safety protocols.
- Ensure proper Quality Assurance (QA) and Quality Control (QC) processes are implemented across all engineering disciplines.

Requirements:

- Degree in Engineering (Mechanical, Civil, Electrical, or a related discipline).
- Project management certification (desirable).
- 5+ years of experience in engineering project management.
- Excellent proficiency in MS Office, MS Project, AutoCAD 2D, and other engineering software.
- Basic knowledge of Deswik (preferred).
- Strong communication skills in English, both verbal and written.
- Strong knowledge of open pit and underground mining operations.
- Extensive knowledge of mining operations in both surface and underground activities.
- Proven experience in leadership, team management, and handling multiple projects, with strong skills in scheduling, cost control, and risk management.
- Ability to manage projects, time, and priorities with flexibility and critical thinking.
- Exceptional problem-solving, decision-making, and negotiation skills.
- Strong technical and leadership abilities, attention to detail, and a results-oriented approach.
- Capability to work effectively in a dynamic environment with solid communication skills.
- Driving License.

Our company offers a competitive remuneration package that includes an attractive combination of basic salary and benefits, as well as opportunities for development in a challenging work environment.

Inclusion and Diversity

Hellas Gold is an equal opportunities employer. We are committed to promoting an inclusive and diverse workplace where we value and respect every colleague for who they are and provide equality of opportunity so that everyone can fulfill their potential.
