- Collaborate with internal teams, including engineers and architects, to ensure seamless project execution.
- Conduct research on materials, manufacturing technologies, and industry trends to inform design decisions.
- Contribute to the development of prototypes and new product lines.
- Ensure high standards of both functionality and design quality for all products.

Qualifications & Candidate Profile Requirements

- Bachelor's degree in Industrial Design, Product Design, or a related field.
- 2-3 years of experience in industrial design or product design, with expertise in designing for the construction or industrial sectors.
- Proficiency in CAD software (SolidWorks, Rhino, AutoCAD, or similar).
- Understanding of modern design trends and industrial production processes.
- Knowledge of prototyping tools (e.g., 3D printing, CNC) will be considered as a plus.
- Strong creativity and excellent aesthetic judgment.
- Attention to detail and problem-solving skills.
- Excellent command of the English language.
- Ability to work well in a collaborative, team-oriented environment.

Compensation & Benefits

- Competitive monthly gross salary
- Private medical
- Ongoing training and professional development opportunities
- An innovative and collaborative working environment, fostering creativity and growth
