

At **Work4u**, we specialize in providing innovative staffing and recruitment solutions tailored to meet the unique needs of businesses. As a trusted partner, we offer a full range of HR services, helping companies build strong and effective teams.

On behalf of our client, a maritime consulting firm specializing in shipping operations, we are seeking a **Naval Architect** to support the daily operations of the Technical Department.

The selected candidate will work closely with the internal technical team, providing assistance in the preparation of shipboard manuals and technical documentation in line with current regulations, rules, and industry standards.

The role focuses on the accurate and timely production of technical deliverables, ensuring a consistently high level of quality and compliance.

What You'll Do:

- Assist in the preparation and review of shipboard manuals and technical plans.
- Ensure all documentation meets relevant maritime regulations and internal quality standards.
- Collaborate with engineers and technical team members on day-to-day tasks and project deliverables.
- Maintain clear and organized records of documentation, submissions, and revisions.

What We're Looking For:

- BSc in Naval Architecture (TEI or AEI).
- Excellent verbal and written communication skills in English.
- Knowledge of AutoCAD 2D.
- Previous relevant experience will be considered an asset.
- Ability to work both independently and as part of a team, even under tight deadlines.
- Strong organizational and time management skills.

If you are interested in the position, please feel free to send your CV to akadeli@work4u.gr. Alternatively, you can contact us directly at +30 694 376 5120
