

## **Job Opportunity: Junior Structural Engineer**

*Athens | Full-time*

### **About Us:**

Omikron Kappa Consulting SA is a leading engineering consulting firm, specializing in major infrastructure projects both in Greece and internationally. Join our team and work on innovative projects that make a difference!

### **Why Join Us:**

- ✓ **Mentorship:** Work alongside experienced engineers who are eager to support your growth.
- ✓ **Impact:** Contribute to high-profile projects that shape communities.
- ✓ **Learning:** Continuous professional development and training opportunities.

### **Key Responsibilities:**

- Support the development of structural models and generation of calculations
- Assist in the preparation of technical reports and design specifications
- Collaborate with multidisciplinary teams (e.g. geotechnical, hydraulic, geological etc.)
- Stay updated on industry trends, regulations and practices

### **Candidate Profile:**

- Diploma in Civil / Structural Engineering (*postgraduate studies in Structural engineering will be considered a plus*)
- Some experience in structural design (e.g., internships, entry-level positions) is desirable
- Familiarity with structural software such as Sofistik, Midas, Scia
- Working knowledge of AutoCAD and MS Office
- Excellent written and verbal communication skills in both Greek and English

### **What We Offer:**

- Competitive salary based on qualifications
- A full-time position in a reputable company
- Opportunity for rapid skill development and career advancement
- A collaborative environment that values excellence and learning

### **Application Process:**

Interested candidates are invited to submit their CV to [info@omikronkappa.gr](mailto:info@omikronkappa.gr), with the reference code **STR.02** All applications will be handled confidentially.
