

Deloitte – AI Bootcamp 2026 (Engineering, AI & Data)

Train with Deloitte. Build with AI. Launch your career.

What impact will you make?

Whether you're passionate about solving real-world problems with data, curious about Artificial Intelligence, or eager to explore how skill-based organizations use AI to transform the way they operate, this is your opportunity to become part of something future-focused and impactful.

At Deloitte Greece, excellence is part of our DNA. We bring together exceptional talent to help organizations solve complex business challenges through technology, engineering, and innovation.

Engineering, AI & Data Team is launching its **AI Bootcamp in Athens** this September, a unique, hands-on learning experience designed to develop the next generation of AI professionals and create a pathway toward advanced AI engineering and **AI Forward Deployed Engineer (FDE)** roles.

Why AI? Why now?

We're not just adopting AI, we're engineering its impact.

As organizations rapidly embrace Generative AI, Machine Learning, and intelligent automation, they need professionals who can bridge cutting-edge AI technology with real business problems. This is exactly what our AI engineers, and eventually our AI Forward Deployed Engineers, do every day.

This Bootcamp is your first step into that journey.

What to expect during the Bootcamp

 **Dates:** 21st September – Early October 2026

 **Schedule:** Monday to Friday | 09:00 – 15:00 | On-site in Athens

During this immersive program, you'll build the technical foundations required for a career in AI consulting and engineering.

What's in your stack?

- Understand the fundamentals of Artificial Intelligence, Large Language Models (LLMs), and Generative AI.
- Gain hands-on experience with Python and modern AI development frameworks.
- Explore how AI agents and multi-agent workflows are designed and orchestrated.
- Learn the fundamentals of Retrieval-Augmented Generation (RAG), embeddings, and vector search.
- Work with real-world datasets and document processing techniques, including ingestion and retrieval.
- Experiment with prompt engineering, model evaluation, and AI model integration through APIs.
- Translate business challenges into practical AI solutions and use cases.
- Apply agile ways of working while collaborating with experienced Deloitte professionals who will mentor and guide you throughout the bootcamp.
- Build valuable connections with Deloitte professionals and like-minded peers.

Upon completion

You'll receive a **Deloitte AI Bootcamp Certificate**. 

Top-performing participants may be considered for a role within Deloitte's Engineering, AI & Data Team, working on real AI solutions for leading organizations. As your experience grows, you'll also have the opportunity to evolve toward **AI Forward Deployed Engineer (FDE)** roles, working directly with clients to design, build, and deploy AI solutions that deliver measurable business impact.

Who we're looking for – #WinningRequirements

- Recent graduates in Computer Science, Engineering, Data Science, Mathematics, Management Science & Technology, Business Informatics, or related fields.
- Tech-curious individuals with a strong interest in AI, innovation, and problem-solving.
- Analytical thinkers with strong communication and teamwork skills.
- Fluent in Greek and English.
- Proactive, curious, and motivated to learn cutting-edge technologies.

Ready to make an impact?

Limited spots are available Apply now to join Deloitte's AI Bootcamp and kick-start your career in AI with one of world's leading professional services firms.

To express your interest, please send your CV to:

- gmeramveliotakis@deloitte.gr
- agournari@deloitte.gr

Applications will be reviewed by Deloitte's HR team, and selected candidates will be invited to join the AI Bootcamp.

Train with Deloitte. Build with AI. Launch your career.
