

Position: Junior Superintendent Engineer

Location: Piraeus, Greece

Full time

Blue Planet Shipping is seeking to recruit a Junior Superintendent Engineer to provide support to the Technical Manager and Superintendent Engineers.

Key Responsibilities:

- Assist the Technical Department in the day-to-day technical management of vessels
- Support the monitoring of planned maintenance schedules, repairs, and other technical operations
- Maintain and update technical records, vessel documentation, and statutory certificates
- Assist in communication with vessels, suppliers, service providers, and shipyards
- Support the preparation for inspections and surveys (Class, Flag State, ISM)
- Assist in the preparation and follow-up of technical reports under supervision

Qualifications:

- Graduate or final-year student in Naval Architecture, Mechanical Engineering, Marine Engineering, or a related technical field
- Excellent command of the English language, both oral and written
- Strong knowledge of MS Office (Word, Excel, Outlook)
- Excellent organizational skills with strong [attention to detail](#)
- Ability to work effectively in a structured, professional office environment
- Previous shipping experience is not required

What to expect:

- Structured training and exposure to vessel technical operations
- Dynamic working environment within the shipping industry
- Opportunity for professional growth and career development
- Supportive team and mentorship from experienced technical professionals
